

ProtoPilot

Empowering Product Managers to Rapidly Generate Software Prototypes

MCS
06

Problem

Product Managers can't build.
Engineers can't read minds.

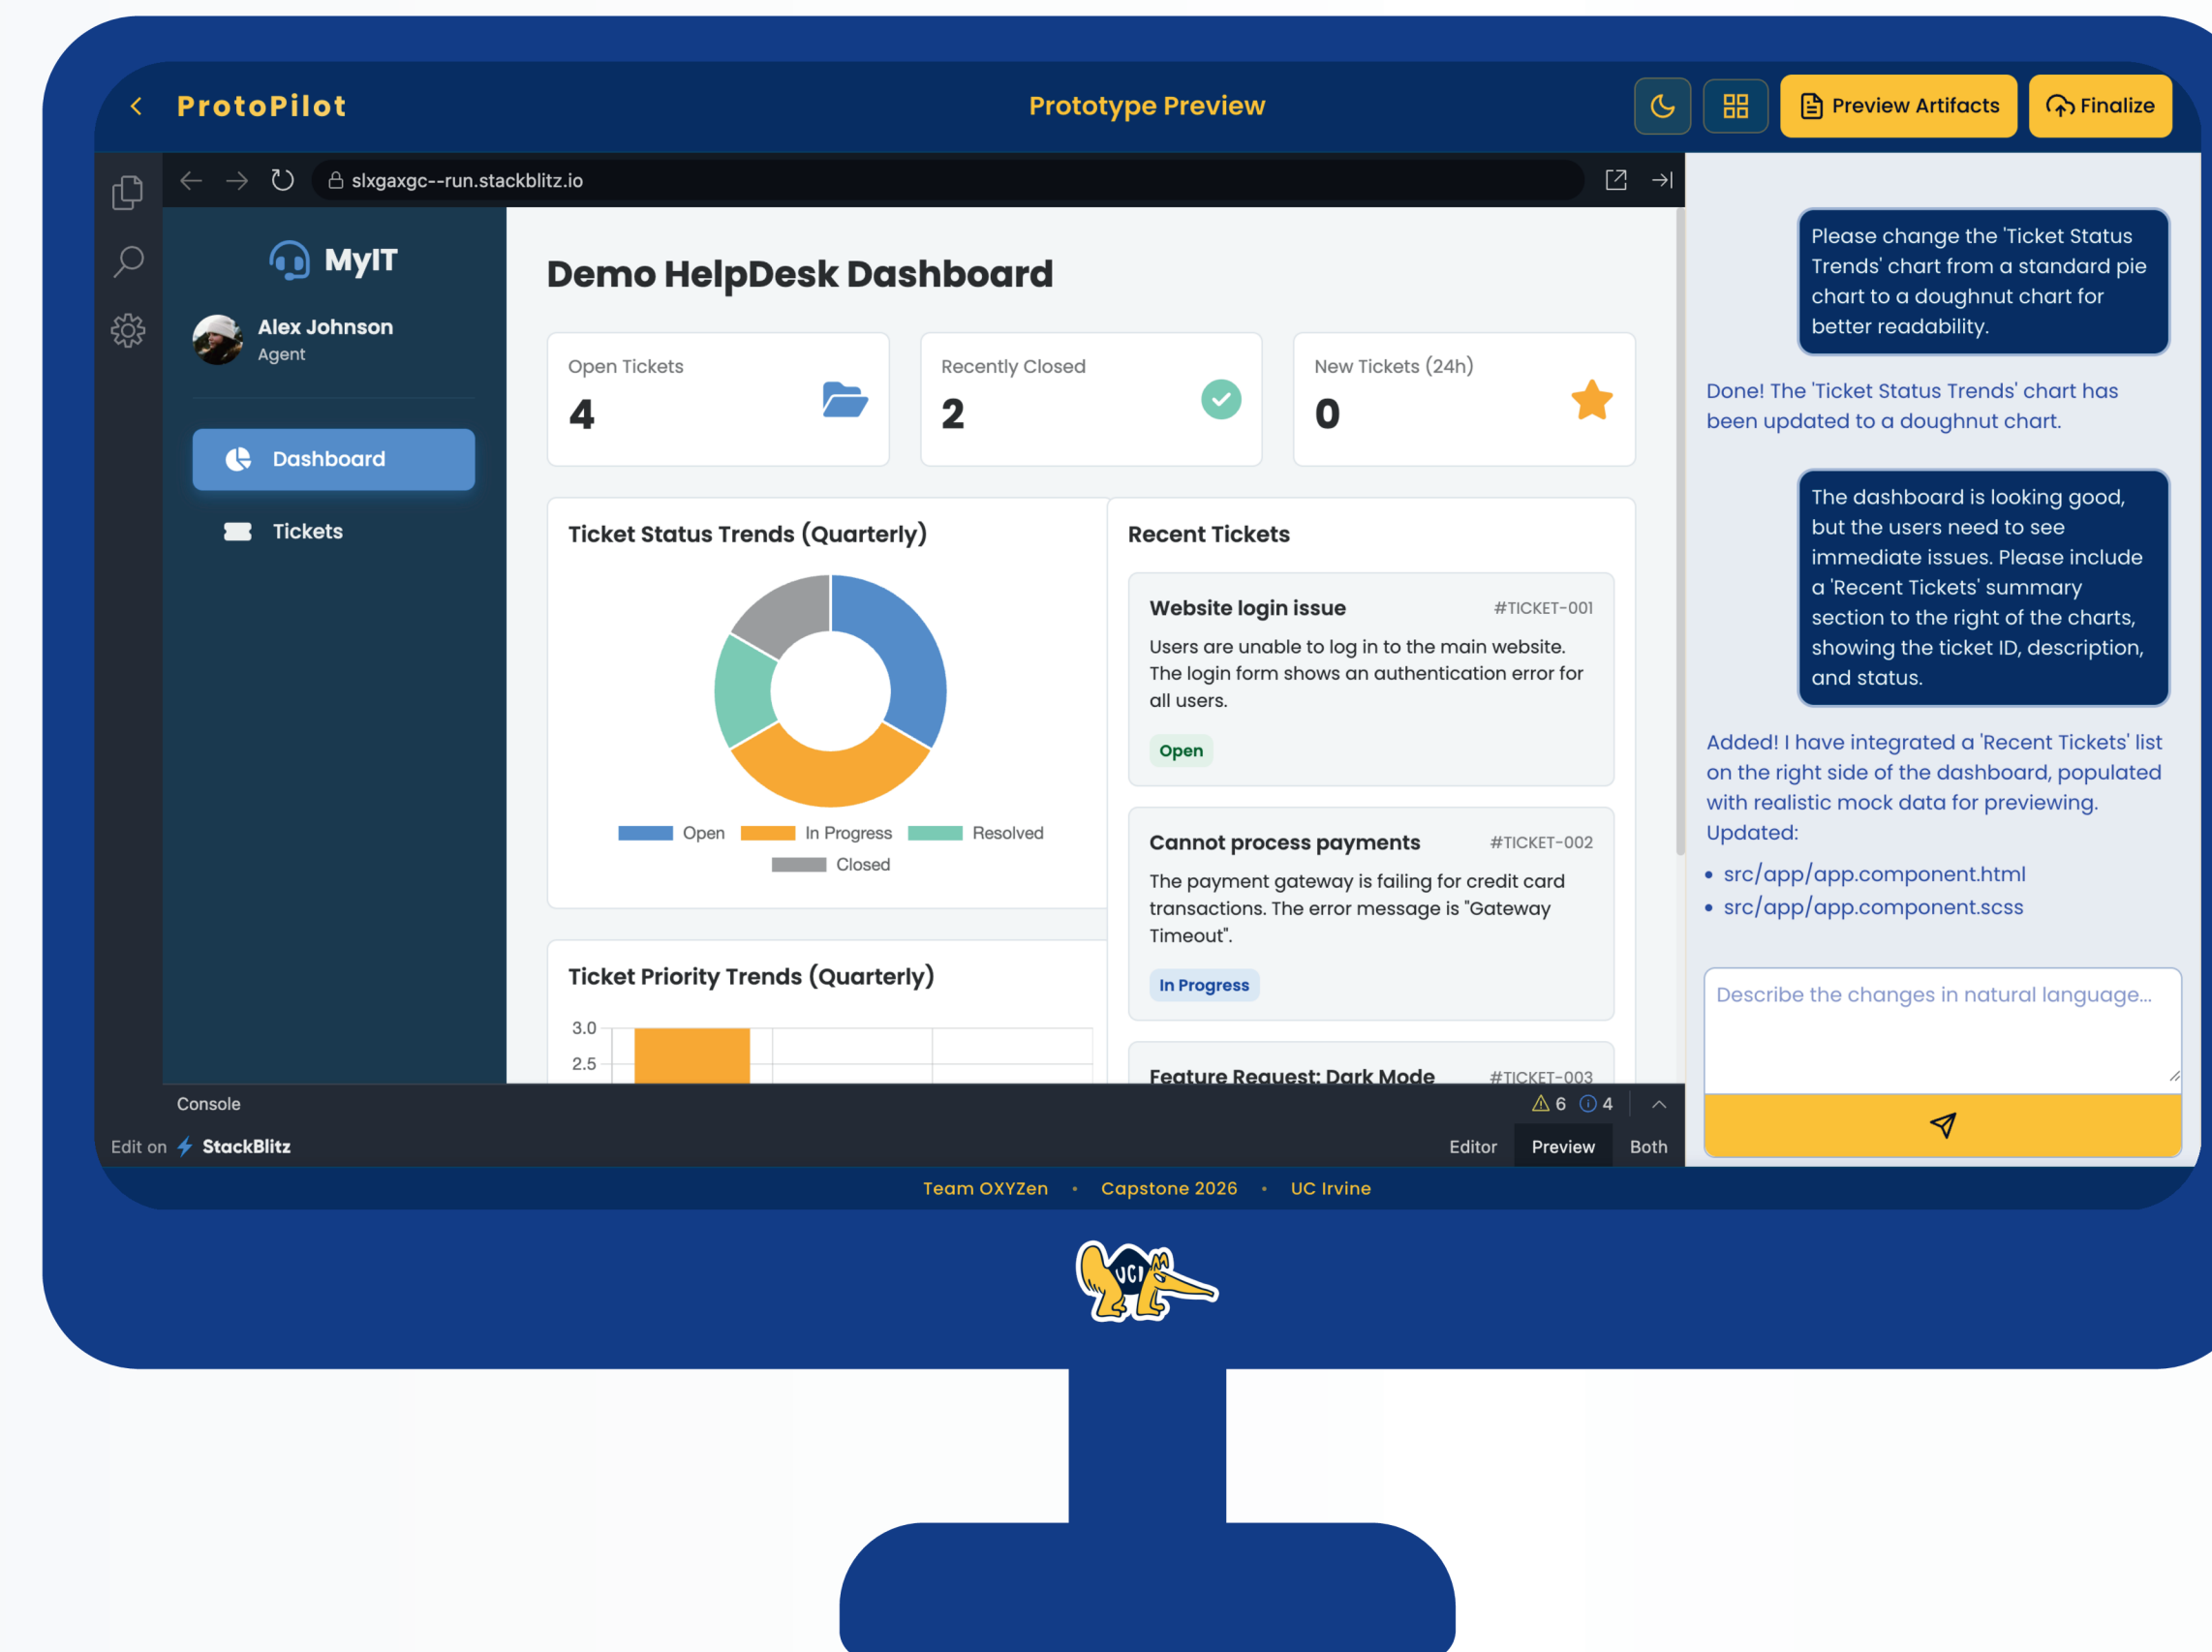

- Ever-evolving customer requirements
- Constant back-and-forth between teams
- Months before the first prototype

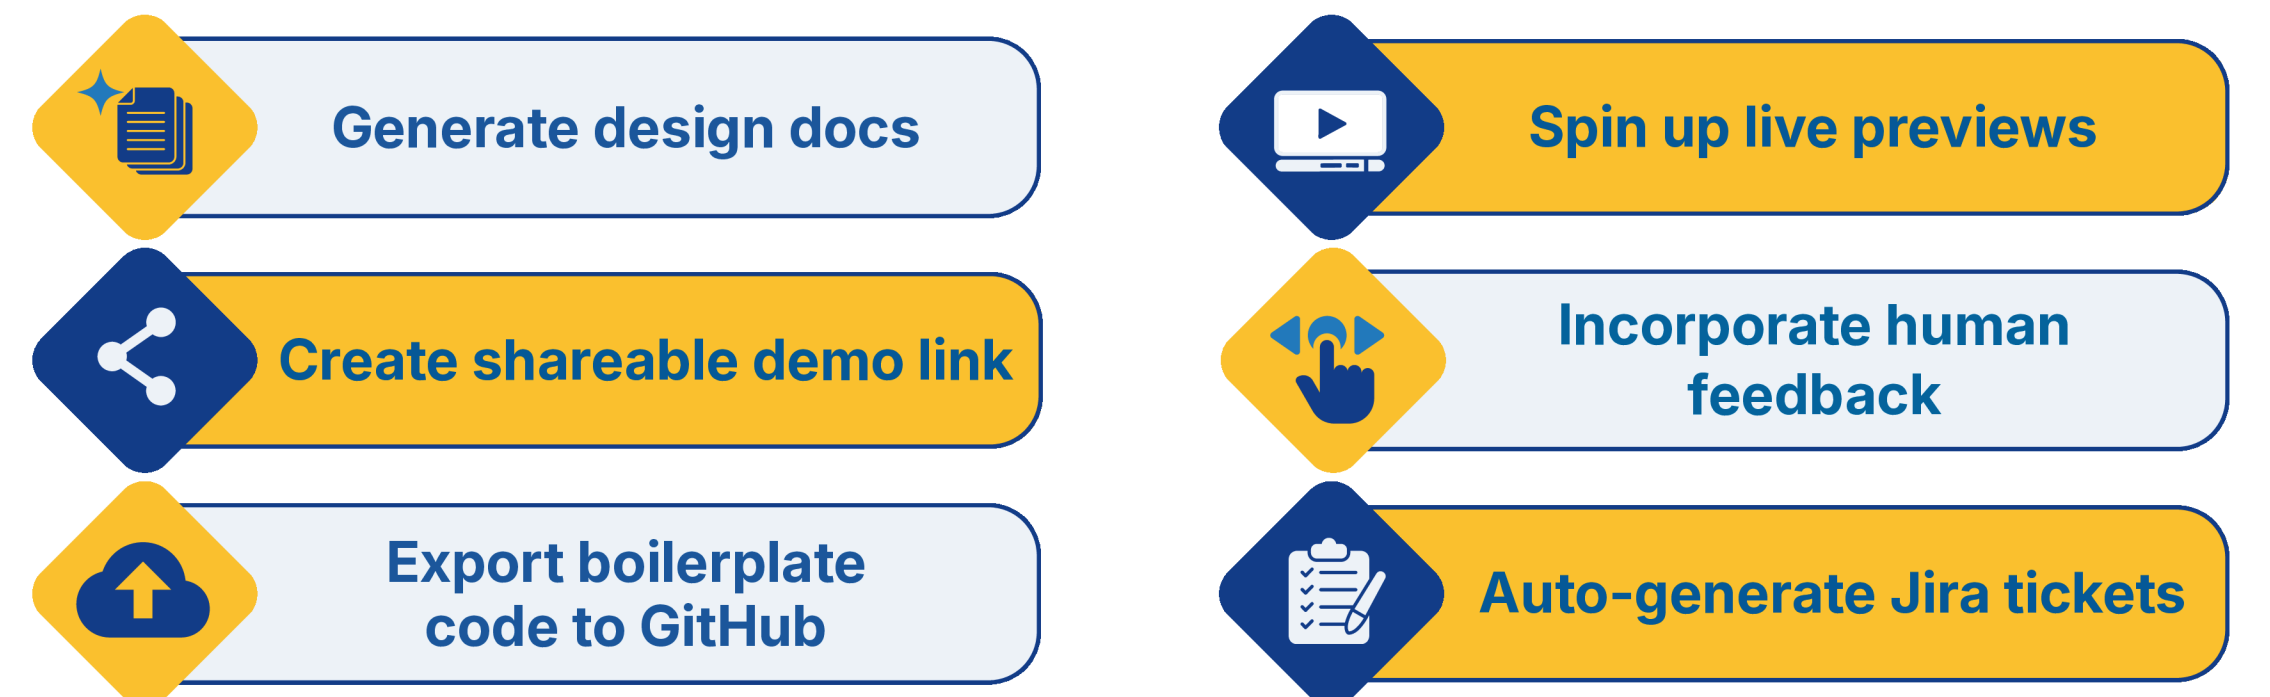

User Interface

Guided Q&A. Clear requirements. Rapid prototyping.

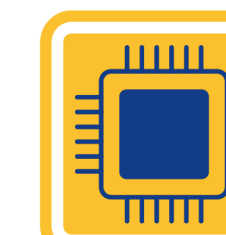

Key Features

Seamless demos. Development-ready handoff.

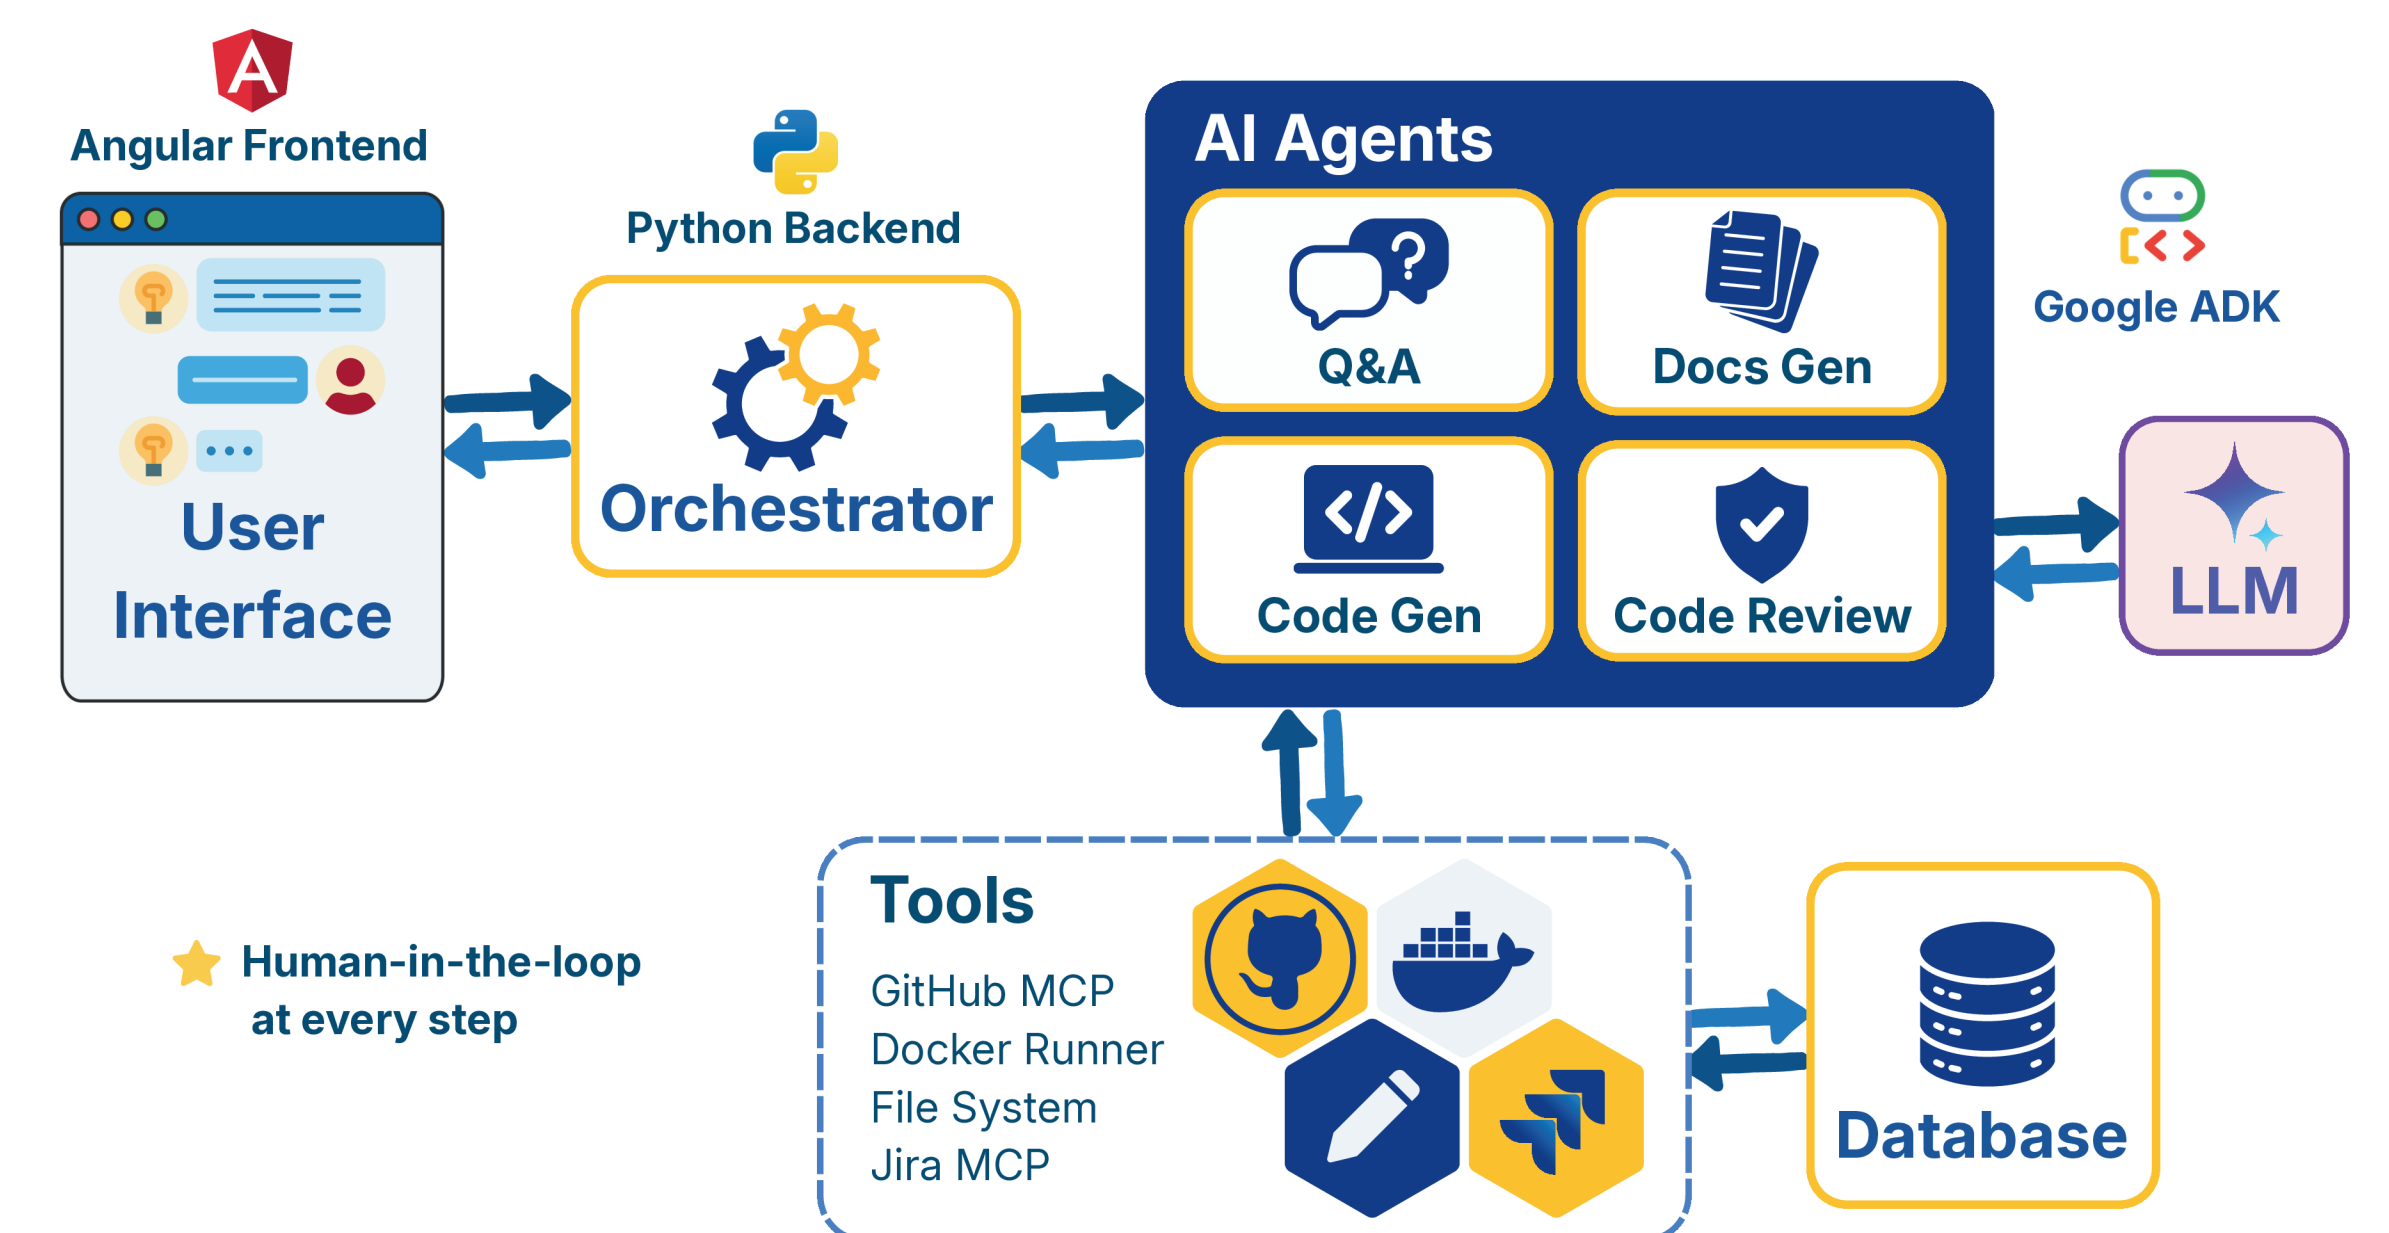

“Going beyond simple AI prototyping, this capability delivers production-ready implementations by translating product ideas directly into working codebases and robust engineering artifacts.”
— Dakota Oberhauser | Project Mentor, Cotality

Architecture

Multi-agent system orchestrating your prototype.

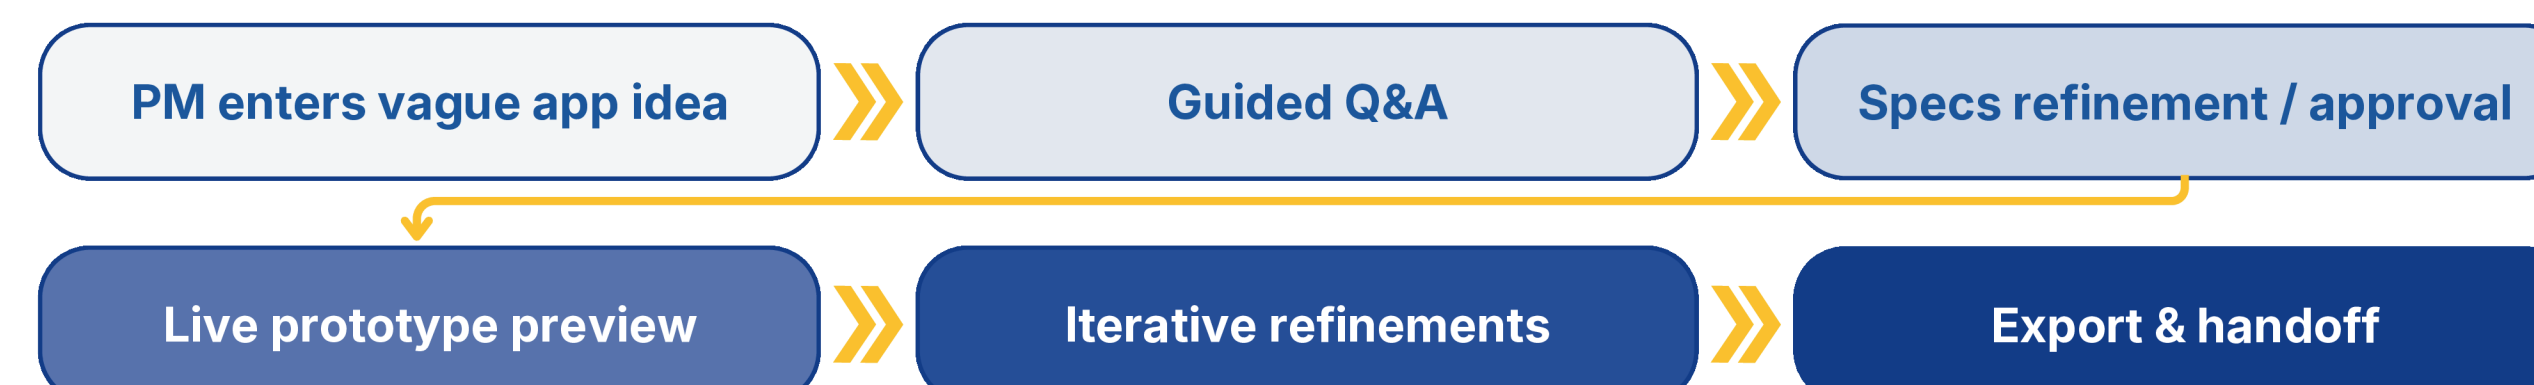

Target Users

Your vision. Zero Code.

Our Solution

From prompt to prototype, instantly.
