

ProtoPilot

AI-powered rapid prototype generator for Product Managers

From vague ideas to working prototypes in minutes.

Omkar Dabir

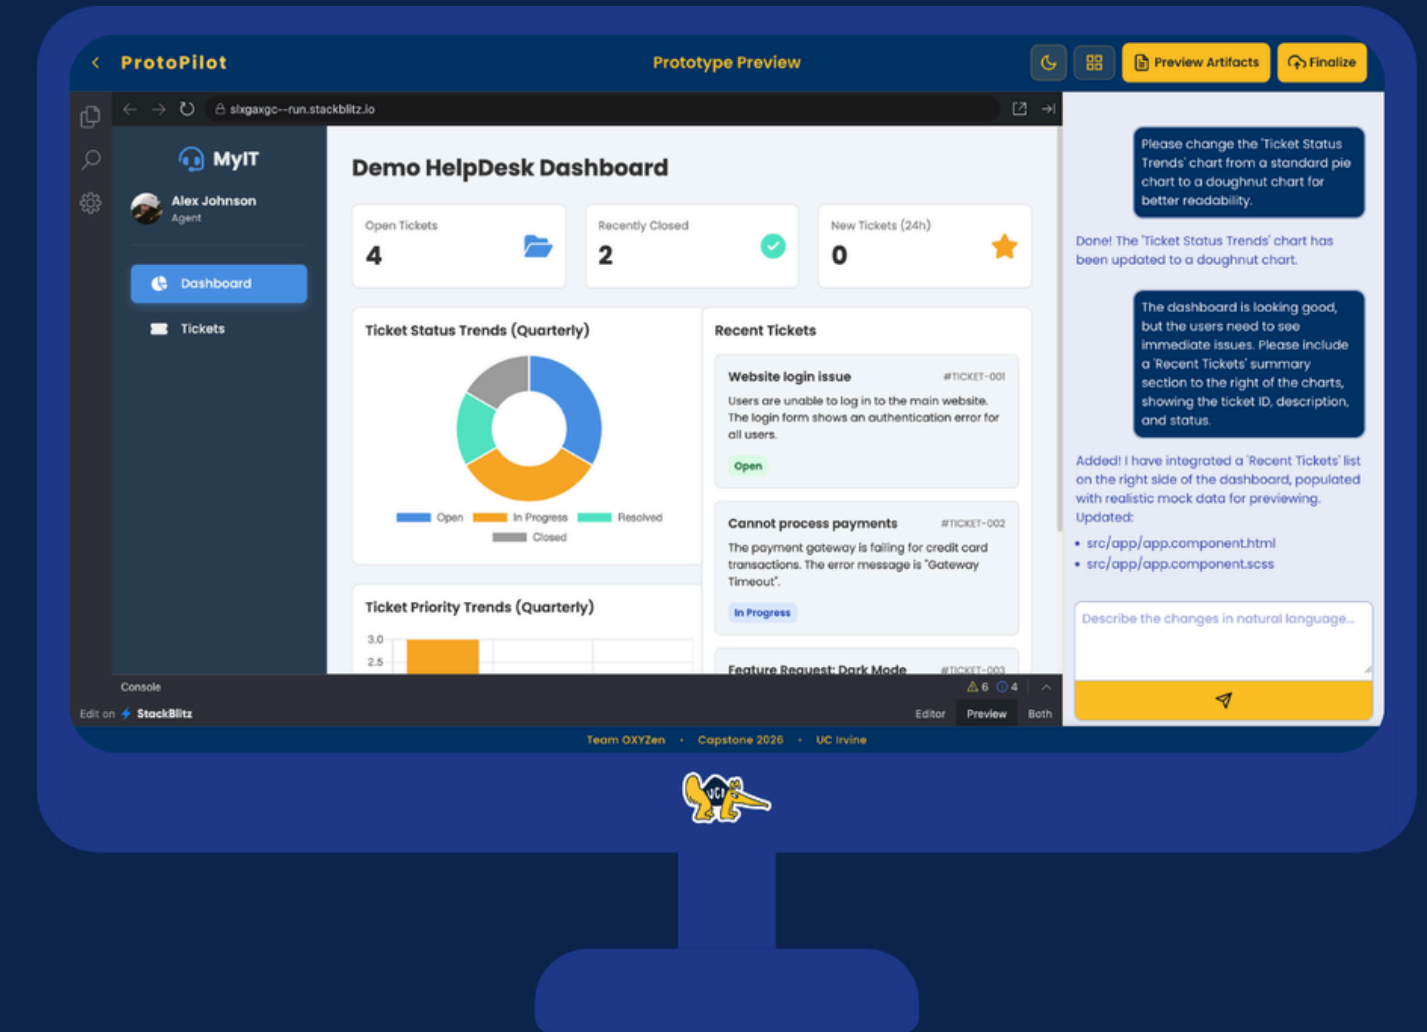

Xin Jiang

Yiniu Han

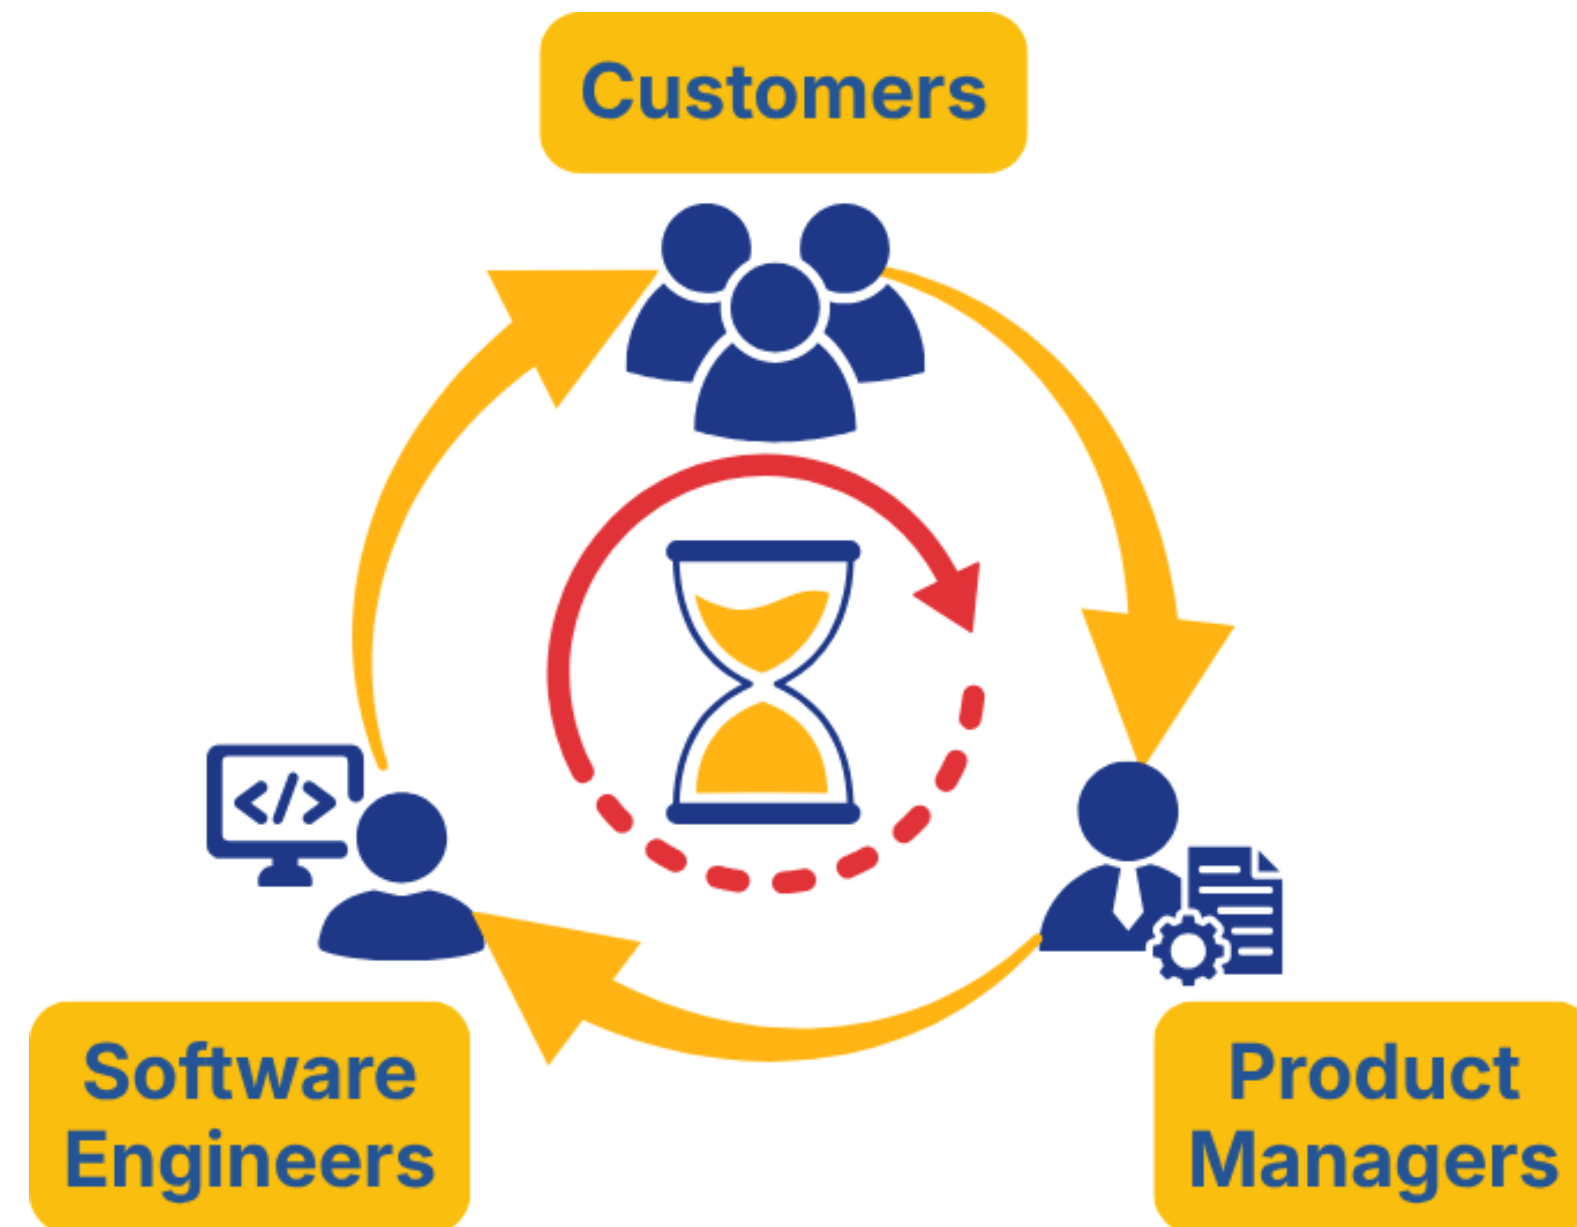

Zhihao Wang

Sponsored by Cotality | Mentored by Professor Ian G. Harris

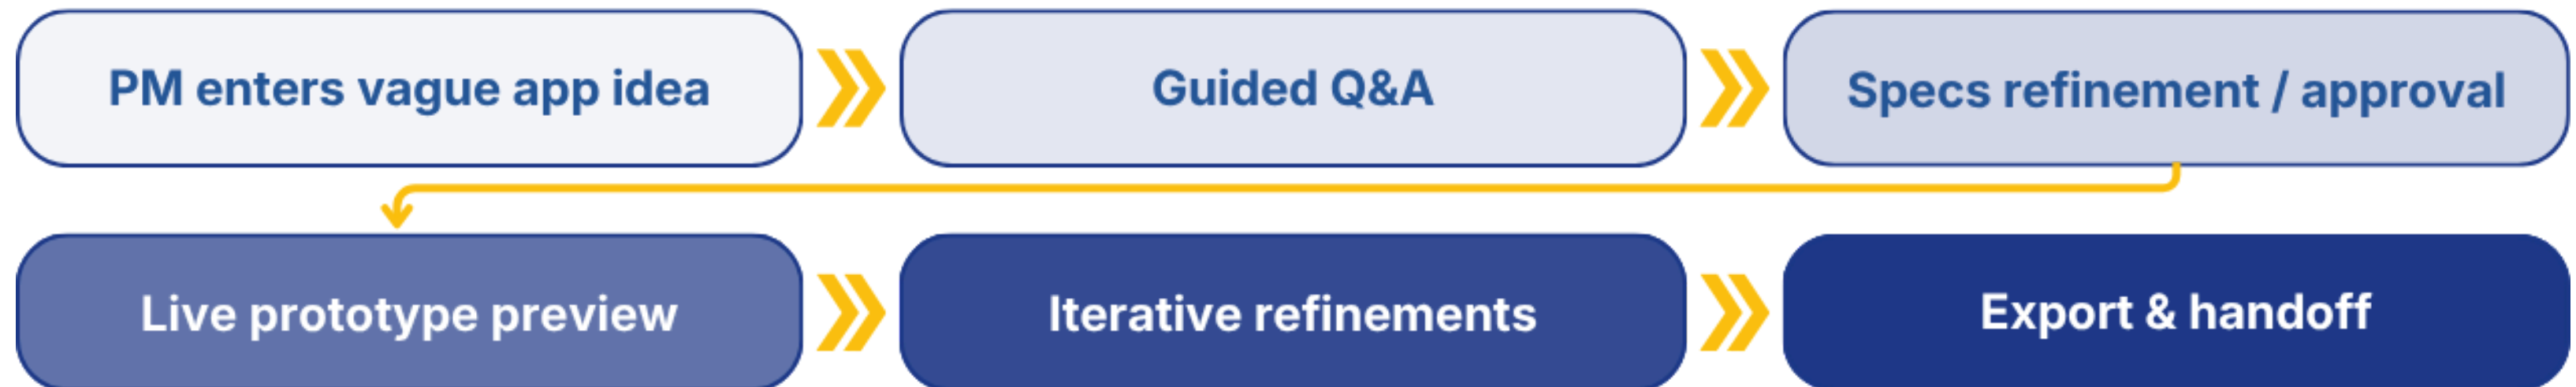

Product Managers can't build. Engineers can't read minds.

- Ever-evolving customer requirements
- Constant back-and-forth between teams
- Months before the first prototype

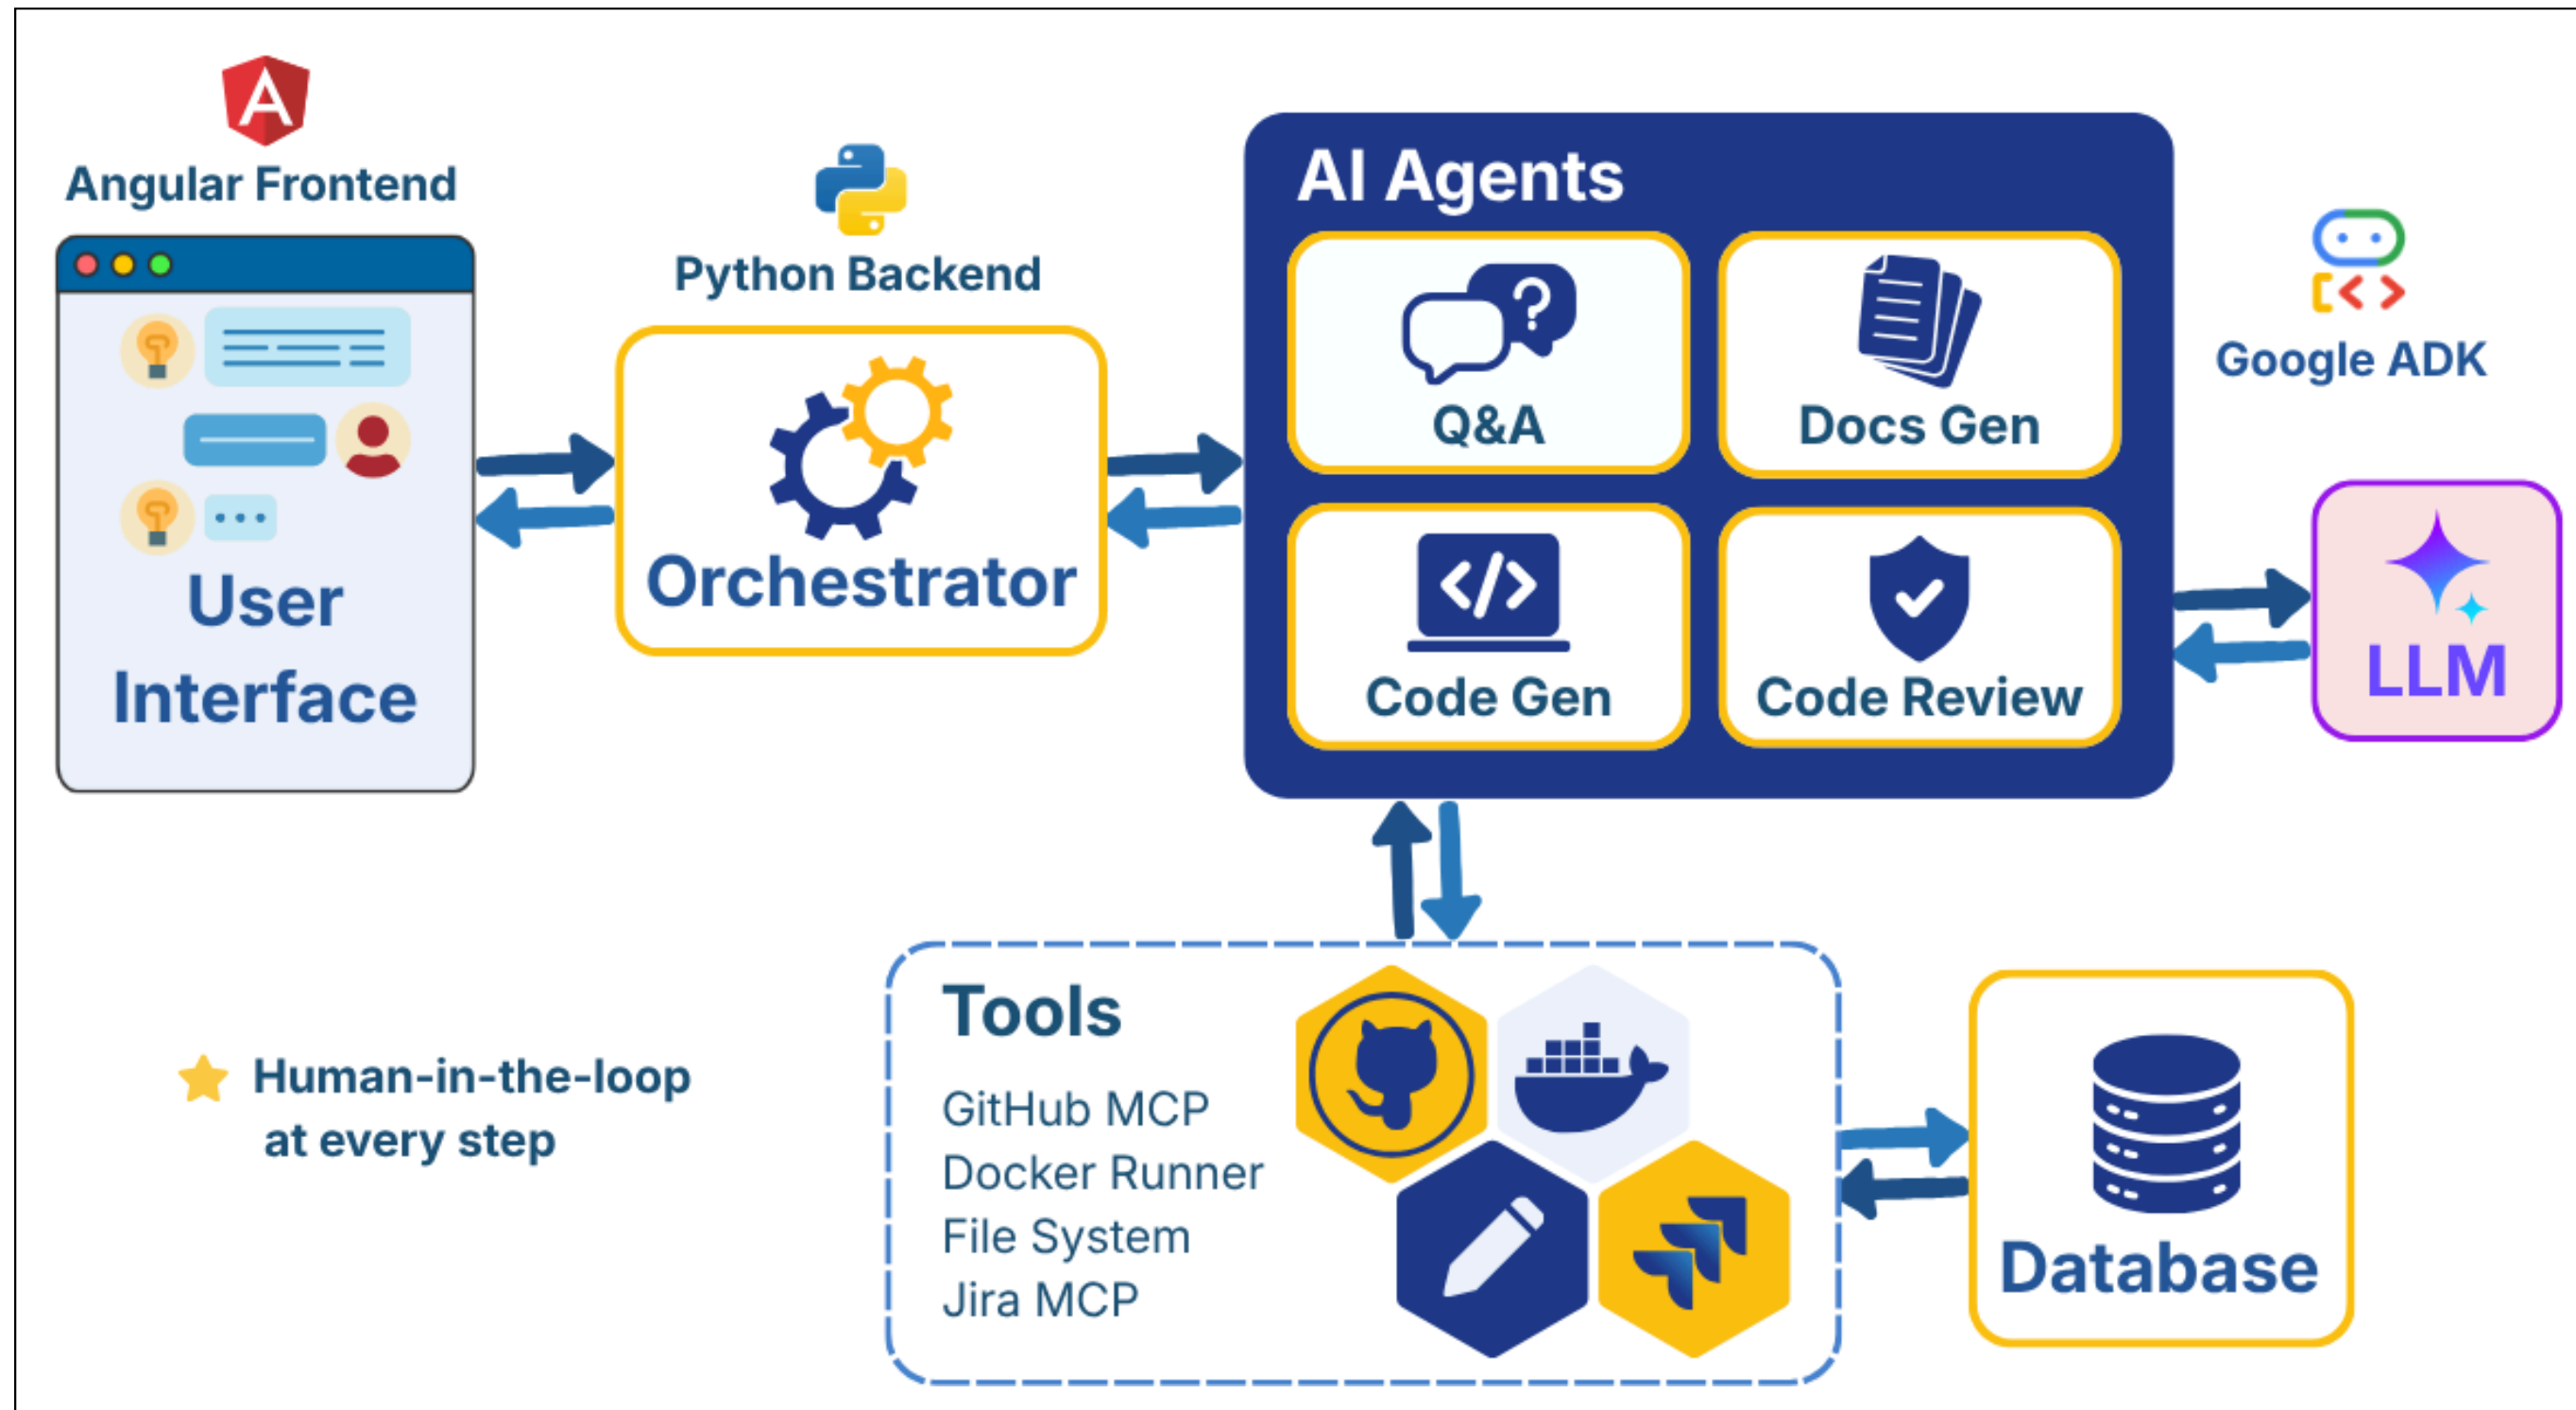

A guided path from ambiguity to prototype

From prompt to prototype, instantly.

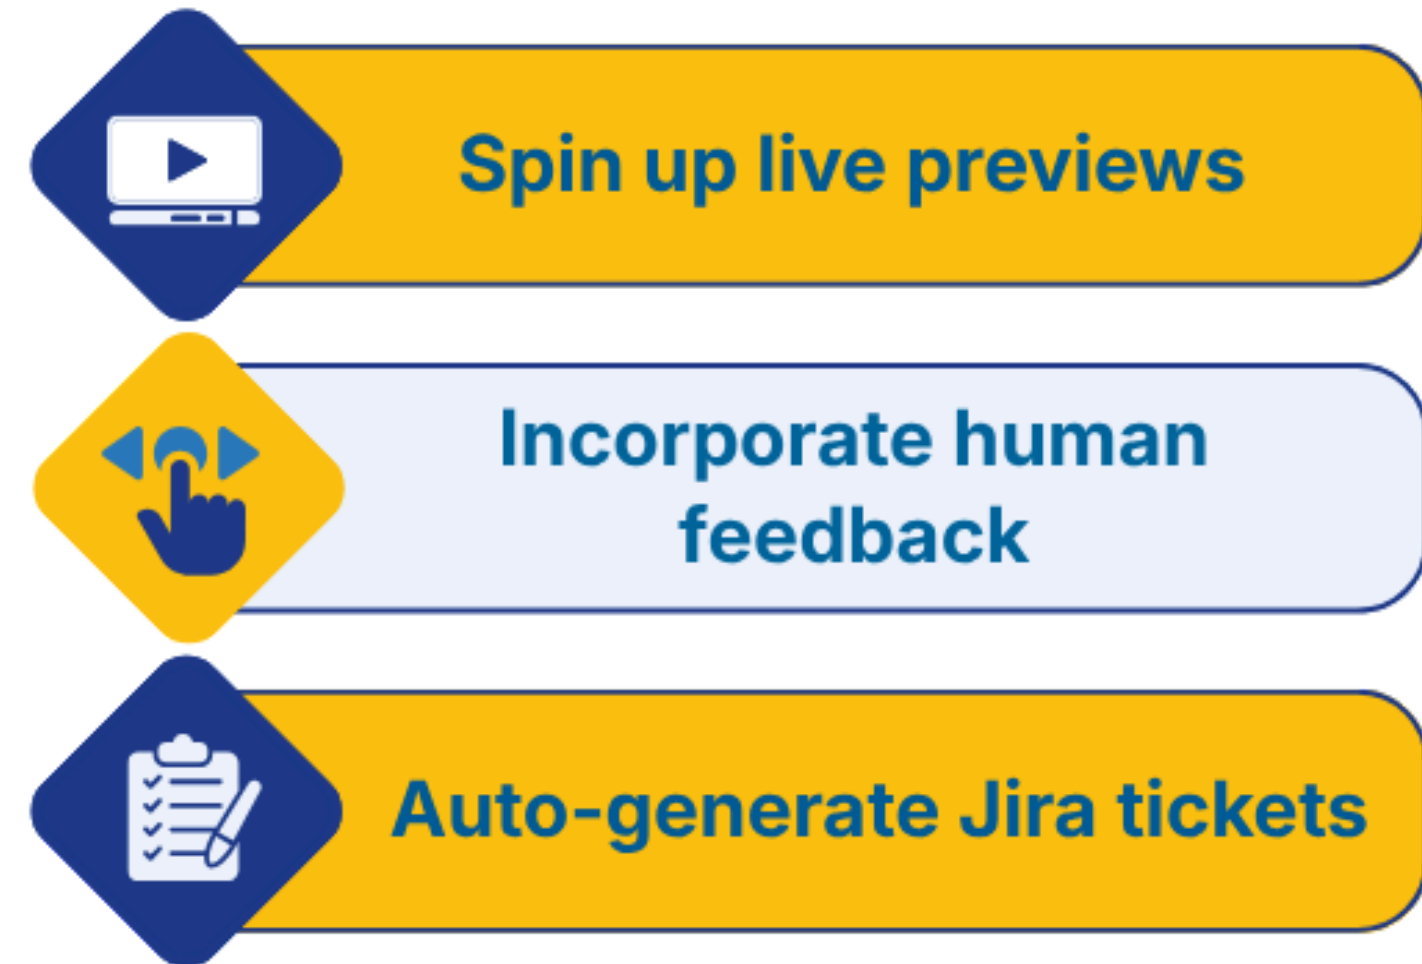

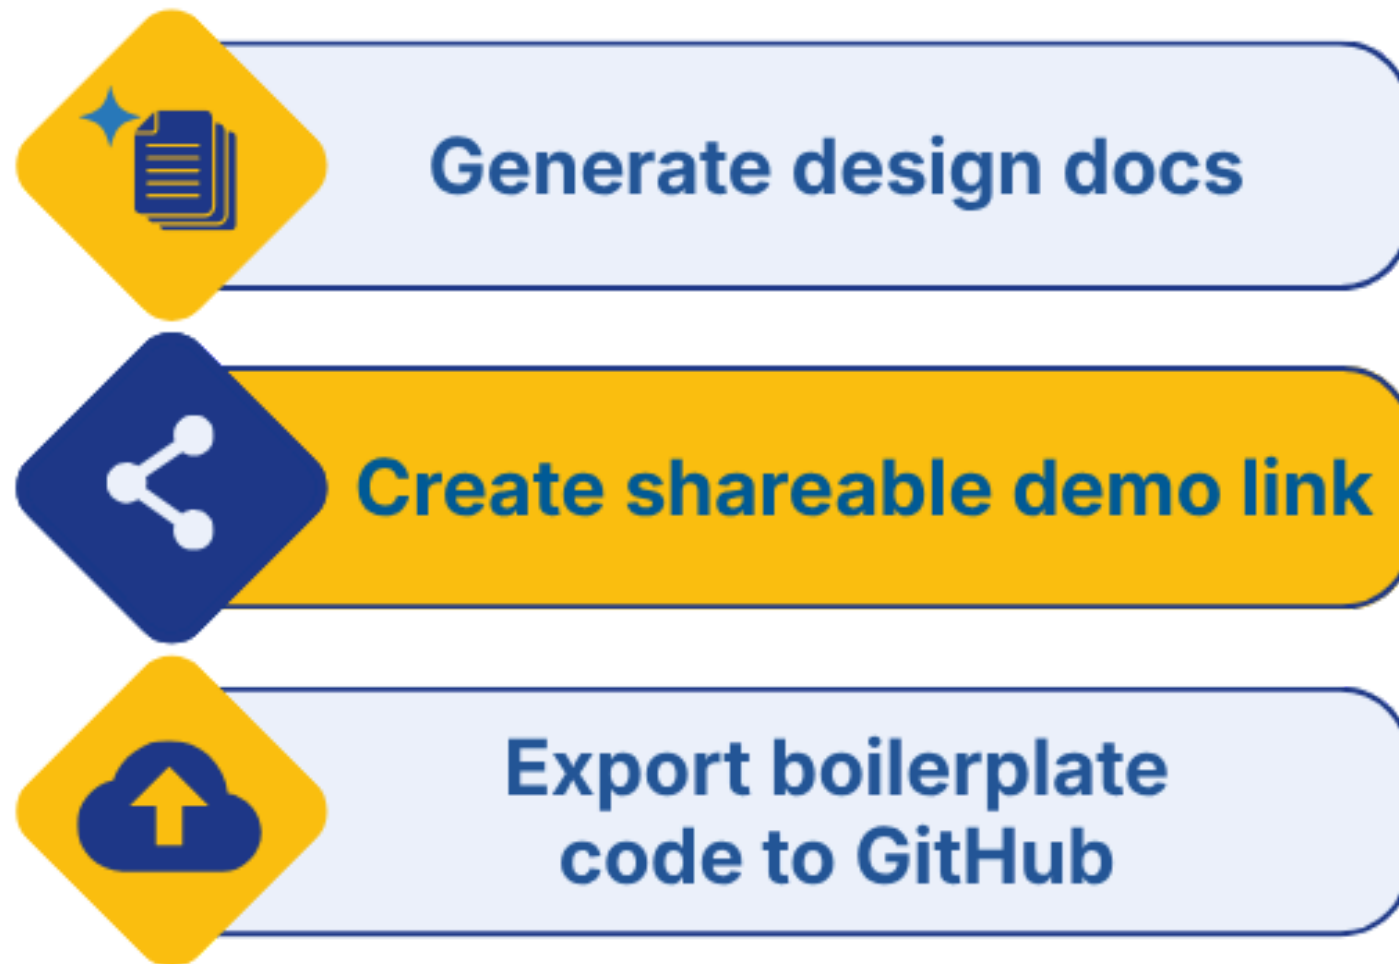

Multi-agent orchestration

Specialized agents create the artifacts and connect to the tools PMs already use.

Live walkthrough

Screens, generated app, export paths, and deployment link.

Not just limited to PMs.

ProtoPilot turns product ambiguity into alignment.

"Going beyond simple AI prototyping, this capability delivers production-ready implementations by translating product ideas directly into working codebases and robust engineering artifacts."

— **Dakota Oberhauser** | Project Mentor, Cotality

Thank You!

Thank you to our sponsors and mentor professors
for support and guidance.
